Introduction

The TSN-G5008 Series switches are ideal for making manufacturing networks compatible with the vision of Industry 4.0. The switches are equipped with 8 Gigabit Ethernet ports and up to 2 fiber-optic ports. The full Gigabit design makes them a good choice for upgrading an existing network to Gigabit speed or for building a new full-Gigabit backbone for future high-bandwidth applications. The compact design and user-friendly configuration interfaces provided by the new Moxa web GUI make network deployment much easier. The TSN-G5008 Series leverages standard Ethernet Time-sensitive Networking (TSN) technology to enable real-time communications with future firmware upgrades adding support for additional TSN standards.
